Descriptif

From the very first kilometers, fans of altitude differences will be served. Hills as far as the eye can see are waiting for you to come and cross them.A piece of advice, set your bike on the small gear, it will be useful...

Then, when you have ridden along the Tude for a good part of the way, head east. In the distance, built on promontories, you will discover the castle of La Mercerie (also known as the little Versailles of Charente) and the castle of Villebois-Lavalette (the end of the stage)... And take our word for it, these little historical treasures are well worth a visit.
